Of the Eclipse this yeare.

THe 17. day of August about 4. of the clock and 4. minuts in the morning there will appeare vnto vs in our Horizon an Eclipse of the Moone, which will begin after midnight 20. minuts and be at her greatest obcurity about two of clock and 12. minuts, and wilbe eclipsed 14. digits and a halfe and will be ended and attaine her light at 4. of clock and 4. minuts in the morning, the effect wher of I forbeare to speak of because smal Eclipses cause smal effects.

A rule for Bloud-letting, Purging, Bathing, Setting, Sowing and Planting.

LEt no bloud at any time without great cause, for it inuceth weaknesse and many Infirmities, if it must be done see that it be performed after good digestion, and fasting, in faire temperate wether: And beware of all manner of exresse, as labour, watching, and carnall Copulation, &c. And vse after the same meates of easie digestion, and abstaine from labour, watching and carnall copulation, till the fourth day. And these signes be vnmeet and bad for bloudletting the moone in ♉ ♊. ♌. ♍. and ♐. the last halfe of ♎, and the first halfe of ♏. the rest are all indifferent good so that the Moone be not in the signe that gouerneth the member. Furthermore let the Flegmatick bloud in the Signe of Aries and Sagitarius, the Melancholick persons in Libra and Aquarious: and for the Cholorick persons Cancer, Scorpio and Pisces and the Sanguine Aries, Cancer, Libra, Scorpio, Sagitarius, Aquarius and Pisces. Furthermore from the new Moone to the first quarter is a fit time to let young men bloud in, and from the first quarter to the full moone good for mydle age, and from the full moone to the last quarter good for aged folks, and from the last quarter to the change, best for old men.

Note also that we must not let bloud when Mars and Saturne haue any aspect the one to the other, neither the Moone to Saturne, or Mars, neither any aspect of the Moone to the Sun, nor the Moone to the Dragons tayle, and in the Spring let bloud in the right side, in harnest at the left side.

Of Purging.

The beſt time to purge is, neither the time being too hot nor too cold: for by the rules of Aſtronomy, the beſt time is when the Moone is in cold and watry Signes as in Cancer, Scorpio, Piſces and Gemini, being comforted by any Aſpect of good Planets: and the Moone in Aries, Taurus, Leo, Virgo, and Capricornus, be not good to purge: and the cauſe of vomiting the purgation is, if the Moone haue any Aſpect to any Planet retrograde.

Of Bathing.

If the Moone be in Aries, Leo, Sagitarius, Cancer, Scorpio and Piſces, it is a good time to bath: and theſe following be euill to bath as Taurus, Virgo, and Capricorne.

Good to ſtop Fluxes, Rhumes, and Laxes, the Moone in Taurus, Virgo and Capricorne.

To comfort Vertue attractiue the Moone in Aries, Leo, and Sagitarius.

The Vertue retentiue the Moone in Taurus, Virgo, and Capricornus.

For digeſtiue the Moon in Gemini, Libra, and Aquarius.

For the expulſiue the Moone in Gemini, Cancer, Scorpio and Piſces.

For Setting, Sowing and Planting.

Good to ſow ſeeds, the Moone in Taurus, Cancer, Virgo, Libra and Capricornus, in the increaſe of the Moone: to plant, the Moone in Taurus & Aquarius, in the increaſe being fixed Signes; better for planting ſowing and graffing the Moone hauing Sextill or Trine Aſpect with Saturne: it is good to doe any thing about digging or earing of the ground.

Of the inclination of the Spring, being the ſecond part of the yeare; the Sun in *Aries*, *Taurus*, and *Gemini*.

The Spring hath his beginning when the Sunne entreth into the firſt minute of Aries, which ſhall be this yeare the

11. day of March. As concerning the disposition of the ayre, it shall be cloudy, mysts, and darke weather, with shatp winds, frosts, and suddaine stormes: the infirmities of this season are for the most part caused of euill humours, as agues that proceed of abomndance of hote blould, stitches, and tertian Feuers, ingendered of cholericke blould, Morphew, scabs and pimpels in the face. with Gutta Rosacea, and Ignis Sacer' Impostthumes, flure of blood, as the hemerrhods, bleeding' at the nose, with paines of the ioynts and bones, swellings in the body, as the dropsie in the belly and legs, paine in the ribs, plurisies, and such like, spitting of blould, shortnes of wind, hardnes of liuer and spleene, Jaundis both blacke and yellow, paines in the head and stomacke, with much disposition to vomit, especially in the yonger sort of people.

The Description of *Summer*, the third part of this yeare; the Sunne being in *Cancer*, *Leo*, and *Virgo*.

SUmmer the third part of the yeare, entreth when the Sun commeth to the first minute of Cancer, or tropicke of the Sommer, which is then at the greatest declination to the Northward: the ayre this quarter is likely to be for the most part windy, cloudy, and darke with thunder and lightning, somewhat inclined to raine and showers: the sicknesses of the Sommer that are like to fall, are inflammations in the eyes, swellings in the face, paine in the head, vlcerations in the throat, tongue, and mouth, also poses in the head, Palpitatio Cordis, with paines of the liuer proceeding of hote Agues that are likely to raigne this Sommer, wherefore young cholericke persons shall be now in great danger.

Of the fourth part of the yeare called *Harueſt*, or fall of the leafe; the Sunne being in *Libra*, *Scorpio*, and *Sagitarius*.

AUtumnus or Harueſt doth beginne the Sunne entring into the first minute of Libra the Autummall equinoctiall: this

this quarter is like to be at the beginning faire and temperate, afterwards cold, cloudy, with haile and raine. In this season is like to be great and long sicknesses arising from ill humors, melancholicke and choller icke, quartaine Agues, obstruction and hardnesse of the splene: moreouer, those that are vexed with the disease called Morbus Gallicus, or the Pox, shal be in great danger of death, many shal fall into the dropsie and swellings of the body, many shall be troubled with the Phthisicke, consumption of the body, with vlceration of the lungs, the strangury, cholicke and stone, paines of the belly, as Iliaca passio, Podagra, and Sciatica, Angina, Squinantia, swelling in the face and throat, paine vnder the ribs, with coughings, and shortnesse of wind: these and many more diseases the season before said is like to bring forth and induce, which God I hope for Christs sake will turne from vs, Amen.

IN March sow Peale, Beanes, and Oates, in the beginning graffe and plant fruit trees, and especially in the end of March, couer the Roots of your fruit trees (that were bared before in January) with fat earth at the full of the Moone. And first cleaue the Roots and driue in wedges, & bore holes through the trees, and stop the same againe with pins, all which be meanes to cause them bring forth fruit againe. Also plough and labour your Barly land, carry your dung to the field, & chiefly in the last quarter of the Moone, so shall you be sure it shall not drye away.

Iune.

IN June carry forth your dung to cheare your wheat and Rye lands, bring home your Fuell, set leekes at the end of the month, and sow tender hearbe seeds, mowe downe your lowe Medowes lying neere vnto the water sides.

IN July cut downe your high Medowes and much of other grounds, (the continuance of faire weather is doubtfull) make emplaistration for Roots, lay the knots naked in fruit trees, and about the end of July put your sickle into part of your hard Corne.

August.

AUgust is a time most meet to pull and gather your Summer fruits: reape downe your Rye & Wheat, and get it into the Barnes, and about the end downe with your Oates. And stirre the latter stirring for Wheat and Rye.

September.

SEptember being now come, reape your Barly, pease, Beanes: and about the midst of this moneth sowe Wheat and Rye in strong land, carry your compasse for Wheat and Rye, for one load now is worth any three before this moneth.
